First stage of testing

Date: 08.05.2017 - 16.05.2017

1. **Test name:** Unit testing
Tester: Mihai Alexandru
Device: PC
Environment: IntelliJ
Result:
Observations:

2. **Test name:** Login & registration
Tester: Mihai Alexandru
Device: PC(1920x1080), iPhone 4s (480x320)
Environment: Chrome, Safari
Step 1: FiiForm > Register tab > Name: "alexmihai03"; Username: "alexmihai03"; Email: "alexmihai.03@gmail.com"; Password: "password" > Click Register.
Result: The functionality is on point. User receives visual clues where the text field is required.
Observations: Unusable interface for small devices (320x480, 360x640). The interface barely usable for 1024x1366 and becomes usable above 1040x800. The information panel is too small and it doesn't make good use of the space.
Step 2: FiiForm > Register tab > Name: "12345678"; Username: "__alabala__"; Email: "ala_bala"; Password: "12345678" > Click Register.
Result: Error message: "A user with this email is already registered".
Observations: The *Name* should not contain numbers. The *Username* should not begin or end with "_". The *Email* should finish with "@domain.space". No error messages shown for each of the cases prior described.
Step 3:

3. **Test name:** Login & Signup & Create form
Tester: Bulbuc-Aioanei Elisa
Device: Macbook Air 13" (1440x960), iPhone 5s (640x1130)
Environment: Safari, Chrome
Nr. of executions: 3
Steps:
Result:
Observations:
